SUMMARY

I am a Postdoctoral Researcher at the Autonomous University of Barcelona, and I recently completed a PhD in Sociology and Methodology of Social Research at the University of Milan. My work combines rigorous methodological training with empirical research across institutions in Europe and Latin America. I study distributive justice, social stratification, social networks, and social mobility, focusing on how social environments shape individuals' attitudes and life trajectories. I have taught courses in sociological theory, inequality, and quantitative methods, and contributed to projects on redistributive preferences, meritocratic beliefs, elite reproduction, and network structures. My approach draws on survey data, network analysis, and cross-national comparisons.
